

## Manga/Anime Café (?)

By Taylor Popple

### 1. Introduction

- a. A café with a full menu. Also having reading spaces and manga to buy. It will also have anime viewing events and manga release events. Which allows for bookings and parties and event ticket selling's. I would also like to add an online shop for the manga as well for pickup in the store. And to make this user friendly for mobile and pc. I think this idea would be very beneficial to a company because of the wild growth of popularity in the West for anime and manga, and from firsthand experience of knowing how lucrative of having a place to bring those things together for people to enjoy.

### 2. List of Features

- a. A booking function for reading parties as well as the events tab and being able to purchase tickets to the events. A monthly newsletter the user can sign up for that will have information about the month's events and specials. An online shop to be able to pick up at the store when you get there.
